Office Action Summary	Application No. 10/807,291	Applicant(s) MARGESON, CHRISTOPHER S.	
	Examiner Anita M. King	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is the fourth office action for application number 10/807,291, Acceleration Clamp Assist, filed on March 24, 2004.

Election/Restrictions

Claims 1-12, 14 and 15 are allowable. The restriction requirement related product invention, as set forth in the Office action mailed on December 8, 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 13 is, directed to species no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 16-30, directed to a related combination and subcombination and unrelated invention, respectively are withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

This application contains claims 16-30 are drawn to an invention nonelected with traverse in the reply filed on January 6, 2006. A complete reply to the final rejection must

include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

This application is in condition for allowance except for the presence of claims 16-30 directed to an invention non-elected with traverse in the reply filed on January 6, 2006. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the primary reason for the indication of allowable subject matter in this application are the limitations of an arrangement having a clamp structure and an actuation for applying a clamping force to an object responsive to a means for producing a signal corresponding to the acceleration of an assembly of the object and the surface, included in independent claim 1 and in combination with the other elements recited in the claim, which is not found in the prior art of record. Also note applicant's remarks on page 8-9 of the amendment filed March 28, 2007 discussing how the previously applied reference to Peleg fails to meet the above limitations.

Response to Arguments

Applicant's arguments, see remarks, filed March 28, 2007, with respect to claims 1-4, 7, 9, 10, and 14 have been fully considered and are persuasive. The rejection of claims 1-4, 7, 9, 10, and 14 has been withdrawn.

Applicant's arguments filed March 28, 2007 have been fully considered but they are not persuasive. The request to rejoin claims 16-30 is denied. The claims are classified and would be examined in totally different classes that are not required to be search for the invention of claims 1-12, 14, and 15. It is noted that the reference previously applied to claims 1-4, 7, 9, 10, and 14 was classified in class 73; however, this reference was obtained during a text search. In regards to claims 20-30, the positive recitation of an optical element in claim 21 sets the claims apart from claims 1-12, 14, and 15, which does not require the limitation of an optical element.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
